

I would like to say that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I have been on the "no call" list for the last year, and I am very pleased with it. I do not want to see it get changed! I used to get 6 or more calls a day from solicitors. I did not ask these people to call, and when they did, they were often very rude when I did not wish to listen to them. I get only 1 or 2 calls per week now, and I am so grateful for this! My family life is better, and I get to spend better time with my family.

I think this law was one of the best to be enacted in Indiana lately! PLEASE do NOT make changes to our privacy restrictions!
